

Good morning everyone, today I'm going to share with you my views of youtuber.

People who upload their videos to youtube are called youtuber. They are creative, capable and humorous because they always produce a lot of interesting and professional videos such as a micro film about a special story. Therefore, some of them become famous because of the popularity of their interesting videos.

In Hong Kong, there are different styles of youtubers. They always create videos of different themes, such as make-up tutorials, cooking tutorial, updates about recreation or even analysis of conflicts on relationship. However, they seldom focus on social issues or public affairs. I know some of them are working in a media and movie production company, The Mayfair. It is not attractive in love for all the answer is a talk about social issues. As a result, Hong Kong society is agitated to be indifferent to political issues because Hong Kong youtubers put too much emphasis on entertainment.

I think youtuber should shoulder some responsibilities. They can produce more videos about social issues to raise the awareness of Hong Kong people towards public affairs. As I say they are creative and humorous, I believe Hong Kong people are more willing to get information about these topics through an interesting and creative video produced by famous youtubers.

Youtube is a popular and convenience media platform in Hong Kong. Hong Kong youtubers should take advantage of their talent to contribute to the well- being of Hong Kong society since people can get information easily from youtube.

This is the end of my presentation. Thank you.
